LIVE
CASES

CSI ASIA-PACIFIC 2018

JANUARY 31 – FEBRUARY 3, 2018
HO CHI MINH CITY, VIETNAM

Asia-Pacific 2018 will be a joint meeting with the Vietnam Congress of Congenital and Structural Heart Disease and is organised by the CSI Foundation and the HCMC Pediatric Cardiology & Congenital Heart Disease Society. The meeting will give a comprehensive overview of major topics in catheter therapy of congenital, structural and valvar heart disease.

The program will include lectures from leading experts in the field, live case demonstrations, hands-on simulation training, master class sessions, an industry exhibition and a focus workshop on PDA from A to Z.

WHO SHOULD ATTEND?

Adult and pediatric interventional cardiologists, cardiothoracic surgeons, anesthesiologists, imaging specialists, nurses, technicians, device design specialists, inventors, engineers and any other specialty involved in these procedures.

TOPICS

CONGENITAL HEART INTERVENTIONS

- How to close atrial and ventricular septal defects
- How to use balloons and stents in coarctation and pulmonary artery stenoses
- How to close large patent arterial ducts and pulmonary AV fistulas
- How to treat complex congenital heart diseases in the cath lab

VALVAR HEART INTERVENTIONS

- How to close paravalvar leaks
- How to do aortic, pulmonary, mitral and tricuspid valve implantation
- How to do transcatheter mitral valve repair
- How to do balloon valvoplasty

STRUCTURAL HEART INTERVENTIONS

- How to close post myocardial infarction ventricular septal defects
- How to close the left atrial appendage to prevent embolic stroke in atrial fibrillation
- When to close patent foramen ovale to prevent paradoxical embolism
- How to treat heart failure by interventional techniques

CSI Asia-Pacific is a CSI FOUNDATION EVENT

We are dedicated to the development of congenital, structural and valvar heart interventions worldwide. Our members receive discounted entry to CSI events. Join us at www.csi-foundation.org
